WATER **POLLUTION**

**Water pollution
happens when
dirty things go
into the water and
make it unsafe.**

Factories, toxic
chemicals, sewage
and trash can
make the water
dirty

**When the water is
dirty, marine life
like fish and
plants can get sick
or die.**

Don't dispose items
down the toilets

Do not litter

Use less water

HOW TO PREVENT WATER POLLUTION

Use less
plastic

Dispose oils
properly

Optimize loads
for laundry and
dishwashing

Reuse items

Use environmentally
friendly detergents

To help the
earth we should
reuse bottles ,
Reduce
waste and
recycle

We must keep
our water clean
because we all
need clean water
to live.
